

30-DAY

Science challenge

SUMMER

Can you find, observe, or investigate...

4 different types of clouds - how long does 1 cloud last?	a living thing in an interesting place	cooking in the microwave vs. the oven?	two animals that walk in very different ways	a thing that bounces & one that definitely doesn't
the longest you can make a piece of paper by cutting it	how much vinegar & baking soda to make a plastic bag explode!	something in the night sky bigger than a star (maybe a planet!)	a noise you can make to get something to move	if working out (running etc.) makes you warmer or cooler?
the worst smell you can find - describe it in 3 sentences	how much you weigh going to bed vs. waking up	how many species do you see in a day?!? (plants & animals)	what is the tallest tower you can make out of materials in your house?	a way to engineer a seed to fall the slowest
a cool YouTube that you DON'T think is real (science)	three plants that have different flowers	is cheese better melty?! How can you prove it?	egg-drop challenge - can you make it survive?!?	the difference between baby and adult organisms
which plants have seeds now & which ones have flowers	a way to keep something cold longer	a really OLD rock & a really YOUNG rock?!?!?	a cool YouTube that you DO think is real (science)	something that you think will decompose outside or not...?
design a device to keep you cool	a story about science in the past	create a way to talk with your neighbor from afar	why does the temp. change when it rains?	as many insects as you can in 12 hours
